**WASHINGTON STREET PROJECT UPDATE:**

2/15 - 2/19/2016

Waterline crews have begun test putting for water service connections and will continue doing those for the remainder of the project.

Conduit crews have installed all major parts of 1" conduit. They will return at a later time to perform the open trench connection to the utility pole.

A&M will be installing Erosion Controls along the perimeter of the jobsite and performing saw cutting for the installation of water main. We are expecting to break ground on that project in that week.

We are currently awaiting a date for Dominion Power to start removing the power from all of the existing street light poles so the contractor may proceed with the removal of the poles in the sidewalk area. This means that Washington Street will be without street lights for an extended period of time. New street lights are projected to be phased into service between May 30th and the end of September, with the full project date still scheduled for completion by the end of November.

**REQUEST FOR BUSINESSES/OWNERS OF  
BUILDINGS ON MAIN STREET:**

Please leave your outside lights/porch lights on at night. This will help with safety during the winter nights. Thank you for helping to keep our town lit up!
